IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

Group Art Unit: 3632

GIL TZUR et al

Examiner: Ko Hung Chan

Serial No.: 10/526,313

Filed: March 2, 2005

For: ROLL STOCK CRADLE STRUCTURE

RESPONSE TO RESTRICTION REQUIREMENT

Honorable Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450

Sir:

In response to the restriction requirement mailed January 10, 2008, Applicants elect Claims 1-5, 7-9 and 11, drawn to roll stock cradle support, for prosecution in this application, with traverse.

Although PCT rules are cited for the restriction, the restriction is believed to exceed any requirement for restriction imposed during the International phase of this application.

Moreover, Claim 13 depends from Claim 1 and therefore includes all of the recitations of present Claim 1. Applicants submit that even if Claim 13 is not examined, it would be therefore appropriate to reinstate Claim 13 in the application if apparatus claims are found to be allowable, and if Claim 13 incorporates the recitations of the broadest apparatus claim.

Respectfully submitted,

Ira J. Schultz
